

Ronkonkoma, New York -- February 8, 2010 -- Lintech Components today announced that it has successfully completed certification and qualification assessment by the Defense Supply Center Columbus (DSCC). Lintech is now a qualified distributor eligible to supply FSC 5961 and 5962, military and commercial grade products, as dictated under the Criteria and Provisions document for the QSLD program

The objective of the DSCC is to establish a list of pre-qualified distributors that have process controls in-place to help ensure delivery of quality products that meet the specified requirements. Additionally, it shows that Lintech Components has controls that are applicable value-added inventory services associated with defense logistics.

“Lintech Components has consistently built a reputation of being a trusted supply chain solution for our military customers,” said Ken Linden, President, Lintech Components. “By becoming a DSCC approved supplier, it further shows our commitment to the integrity we put behind all of our efforts to help ensure the success of all of our customers and their programs.”

The Defense Supply Center located in Columbus, Ohio is the largest supplier of weapon systems spare parts and end items for the Department of Defense. To achieve certification, products must be manufactured in the United States and pass stringent laboratory analysis. Specific product characteristics are published by DSCC in its Quality Manufacturers List (QML). Further information can be obtained via their website at [www.dscc.dla.mil](http://www.dscc.dla.mil).
