

## **Lintech Components Announces Its Exhibition at CALCE's East Coast Venue for the Symposium on Counterfeit Electronic Parts and Electronic Supply Chain**

Lintech Components is proud to announce, once again, their support of the SMTA and CALCE by exhibiting at their upcoming Counterfeit Electronic Parts and Electronic Supply Chain Symposium, being held June 28<sup>th</sup>-June 30<sup>th</sup> 2011 at the University of Maryland.

Lintech will be sharing their insights with government, industry and academia on how they address the counterfeit problem by taking a proactive role with a state of the art counterfeit avoidance program, known as C.A.P.P (Component Authenticity Protection Program). Lintech's Quality Management System is certified to ISO 9001: AS9120 and ANSI/ESD S 20.20-2007 with compliance to IDEA-Std-1010A and SAE AS5553.

Dan Semon, Lintech's Sales Manager, invites industry experts and attendees to visit their booth to learn more about Lintech's proprietary C.A.P.P. program. A program that was designed to ensure that only authentic products are supplied to their customers.

This symposium will provide a forum to cover all aspects of changes in the electronic parts supply chain on how an organization performs part selection and management as well as focusing on the solutions that are available and are under development, regarding counterfeiting, by all sectors of the industry.

"Lintech is dedicated to staying at the forefront of component counterfeiting by leading the way with strategic technology investments required to fulfill our zero tolerance policy towards counterfeit components." said Ken Linden, Lintech Components President.

For more information on the Counterfeit Electronic Parts and Electronic Supply Chain Symposium visit: [www.smta.org](http://www.smta.org).

### **About Lintech Components**

Lintech Components is a leading global supplier of semiconductors, integrated circuits, passive components and memory from the world's leading manufacturers for nearly 20 years that has built a reputation based on quality products and services. Our Quality Management System is ISO 9001: AS9120 Certified and AS5553, ANSI/ESD S20.20-2007 with compliance to IDEA-Std-1010A and SAE AS5553.
