

Ronkonkoma, New York – March 16, 2010 -- Lintech Components today announced that it successfully meets the requirements of an SAE AS5553 compliant supplier.

Non-authentic components has become a significant challenge for electronic manufacturers directly impacting NASA and the U.S. Department of Defense. To combat the rising problem of counterfeit components, the SAE standard, AS5553 - Counterfeit Electronic parts; Avoidance, Detection, Mitigation, and Disposition was developed in 2009. It helps standardize requirements, practices and methods for counterfeit parts risk mitigation.

“Counterfeit components can cause severe harm to companies, economies, and people. Lintech Components has always been and will always be committed to eradicating the use of these parts in the aerospace industry to help protect those who rely on us,” says Ken Linden, President, Lintech Components.

#### **About Lintech Components**

Lintech Components is a leading global supplier of semiconductors, integrated circuits, passive components and memory from the world’s leading manufacturers for nearly 20 years that has built a reputation based on quality products and services. Our Quality Management System is ISO 9001:AS9120 Certified and AS5553, ANSI/ESD S20.20, IDEA-Std-1010A compliant. For more info about Lintech Components, please visit [www.lintechcomponents.com](http://www.lintechcomponents.com).

#### **About SAE International**

SAE International is a global association of more than 121,000 engineers and related technical experts in the automotive, aerospace and commercial vehicle industries. SAE International's core competencies are life-long learning and standards development. SAE International's charitable arm is the SAE Foundation, which supports many programs, including *A World In Motion*® and the Collegiate Design Series. [www.sae.org](http://www.sae.org)
