

STATEMENT OF INFRASTRUCTURE CAPABILITIES

Without a solid infrastructure operations slow, resources are underutilized and assets don't move. Lintech Components is a best-in-class distributor sourcing a broad range of infrastructure requirements, specializing in hard-to-find items including legacy electronic components screened for quality and authenticity.

Expert Sourcing

In business since 1991, Lintech has developed procurement strategies and expertise beyond the typical independent distributor. Our seasoned professionals can locate everything from electronic components to the most rugged cable assembly. We can even research and suggest alternate items, where none can be located at an acceptable price point or delivery schedule. Everything is sourced from vendors that have passed through a rigorous selection process.

Quality Assurance

Undetected substandard (including counterfeit) parts can result in serious consequences including equipment failure, work stoppages, and injuries. Lintech Components developed one of the first definitive inspection procedures for quality and authenticity and is widely considered an industry leader in counterfeit mitigation. Our customers trust us to protect them against the risks associated with substandard electronic components through a series of inspections, tests and research as part of our in-house Component Authenticity Protection Program.

Qualifications

Lintech Components maintains up-to-date certifications to all critical standards and retains active membership in key industry organizations. Lintech meets and exceeds all applicable U.S. Government standards (including stringent military and aerospace standards) for quality and authenticity as evidenced by our ISO 9001 and AS9120 certifications, and our adherence to the aerospace industry's AS6081 and U.S. Government's DFARS standards.

Product Lines

- Electronic Components
- Electrical Components
- Hardware
- Fasteners
- Seals & Gaskets
- Wire/Cable Assemblies
- Batteries
- Filters & Pumps
- Pressure Gauges & Transmitters
- Safety Gear & Equipment
- Medical Supplies & Equipment
- Clothing & Uniforms

Services

- Product documentation
- Order expediting
- Project-specific kitting
- Import/export compliance
- Global product support
